FAX: (630) 323-9652

We have provided you with a copy of the immunization schedule for vaccines given in our office. This schedule follows the guidelines of the American Academy of Pediatrics and the Center for Disease Control.

Our practice FIRMLY believes in immunizing children. A child that is not immunized puts him or herself as well as others at risk of deadly infections, especially newborns. We are not willing to jeopardize the health of our patients. Therefore, if you are not wanting or willing to vaccinate your child in a timely fashion with ALL required vaccines, you should find another pediatric practice that better fits your needs. We will be happy to work with you to space immunizations out over a reasonable timeframe that you are comfortable with. However, the attached guidelines MUST be adhered to.

If you have concerns about your child receiving recommended immunizations, we advise that you become educated to the diseases and their effects on the human body. A lot of false information has been generated, especially over the internet. The Center for Disease Control and American Academy of Pediatrics have published quality immunization information. Websites are listed below for your assistance. Please make use of their information before making your decision. Our staff is also happy to answer any of your questions regarding vaccines.

Sincerely,

Hinsdale Pediatric Associates, S.C.
